## EXPERIENCE

### fullstack developer at digiparc (2023 - Present)

- Development of a fleet and transportation management ERP.
- Bug verification and correction.
- Addition of new functionalities to the ERP based on client requirements.

### Internship at digiparc (2 month)

- Developed a Voyage module as part of the company's ERP system for the transportation industry using Angular, Node.js, and MongoDB.
- Designed and implemented the front-end using Angular, ensuring a user-friendly interface and seamless navigation.
- Built the back-end using Node.js and integrated it with MongoDB for efficient data storage and retrieval.
